Re: District Health Management Information System (DHMIS) Policy, Standard Operating Procedures (DHMIS) for Provincial and Sub-District Levels

The National Department of Health developed the following policy and procedures to regulate and manage data collection in the health sector:

- District Health Management Information System (DHMIS) Policy
- District Health Management Information System (DHMIS) Procedure for Provincial level
- District Health Management Information System (DHMIS) Procedure for Sub-District Level

The above mentioned policy and procedures are applicable to the Northern Cape Department of Health and should be implemented. These documents can be accessed through the website of the National Department of Health at www.doh.gov.za.

I hope you find this in order

Regards,

Ms G.E. Matlaopane
Head of Department: Health
